

# Spirulina

Spirulina Extract is made from biomass of the Cyanobacteria Arthrospira Platensis.

The blue green alga Spirulina is arguable nature’s most powerful green food. With over 60% protein content, Spirulina is the highest, most digestible source of “complete” protein. Spirulina is usually grown in open ponds across china, India and the US and requires a sunshine year round. Spirulina can be offered in both powder and liquid forms and qualifies as a clean label blue natural colour. Although sensitive to low pH and high temperatures, Spirulina finds use across the confectionary and dairy applications.

## Applications:

Confections, Dessert Coatings and Frostings, Ice Creams, Yoghurts

## Forms Available:

Product Name	Labels	Form
Futurals Pro Blue	Spirulina Extract	Water Soluble Powder
Futurals Pro Blue XL	Spirulina Extract	

## Stability Conditions:

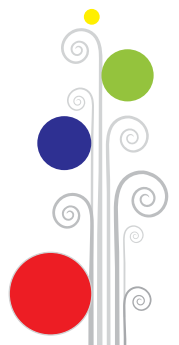

pH Range	Heat	Light
4 - 8	Fair	Fair

## Labelling Recommendation:

Spirulina Extract

## Shades:

Light to Dark Blue
