WOODEN WINDOWS AND DOORS

BRAND

The house
is the essence of your personal space
- The most important people in your life
and the unique interior.

The house is your unique comfort zone
- Family ties and aspirations fulfilled.

THE URZĘDOWSKI BRAND
IT IS ONE OF THE MOST IMPORTANT
QUALITY EMBLEMS OF YOUR HOME.

PASSION FOR CREATION

Aware of our ability, we fully use our potential to create high-quality door and window profiles. Our aim is to search for solutions that will be a source of pleasure and satisfaction for our customers. Improving our skills constantly, we create standards of reliability and professionalism on the market.

MERANTI

This wood comes from deciduous trees of the genus Shorea, which grows mainly in Malaysia and Indonesia. It is the current trend in the production of our wood joinery. White Meranti is chosen and selected by hand, from one specific region in tropical Asia. It is called Philippine mahogany and due to its high quality and durability, it perfectly combines functionality and durability with aesthetics and elegance.

The average wood density: 590 kg/m³

MERANTI PERFECTLY COMBINES
FUNCTIONALITY AND DURABILITY
WITH AESTHETICS AND ELEGANCE.

INNOVATION AND COURAGE

We see innovation as the source of our competitive advantage. That is why we are afraid neither of challenges, nor demanding customers. We constantly look for new solutions. These are designed, based on the latest technologies, so that we can meet the growing demands of the market. At the same time, we remain faithful to our philosophy of combining modernity and courage with experience, and with consideration to the environment.

TEAK

The king of monsoon forests. This wood, which comes from Asia, is characterized by high resistance and a waxy sheen thanks to its high content of natural oils. The diverse colors and interesting arrangement of rings gives the finished products an impressive appearance.

The average wood density: 640-750 kg/m³

TEAK IS CONSIDERED
TO BE THE MOST VALUABLE
OF HARD WOOD SPECIES.

SENSITIVITY TO DETAILS

Taking care of the little things and focusing on each stage of production, we consider as essential elements to create door and window profiles. They are distinguished by high aesthetics and sensitivity to detail. Our products are finished with finesse and attention to every detail. This allows us to extract from any interior, the true beauty and ambience.

PRECISION OF TECHNOLOGY

Our knowledge of wood and its characteristics, re-enforce the basis of our work, because a good start determines the quality of the entire production process. We also systematically launch new technologies and all processes are carried out with high-end machines. We effectively combine technological precision with original design and aesthetics.

DESIGN

We know that joinery is an important accent any of any house. That is why so much emphasis is put both on the aesthetic side of the production of our windows and doors and on a wide variety of wood species and stylistic lines. However, harmonious and elegant design are not everything. High functional parameters go hand in hand with an attractive design. Good acoustic and thermal parameters and attention to safety standards guarantee a high level of comfort for many long years.

AMERICAN WALNUT

An exotic wood species that occurs only in North America. Valued especially for good technical parameters. As a species it is hard and resistant to damage and it fulfils its utilitarian functions very well. An attractive and varied colour scheme and an interesting arrangement of the fibres make it an attractive material that is also aesthetically pleasing.

The average wood density: 600 kg/m³

WALNUT IS DISTINGUISHED BY ITS UNIQUE GRAINING AND ORIGINAL COLOURS.

OUR PASSION

Passion accompanies us at every stage of the product design. That is why we derive fulfillment, self-realization and great joy from our work. The continuous development and improvement of skills mean that our products meet the expectations of the most demanding customers.

SAPELE

In Latin, Sapele means spirituality, healing and growth. This exotic African wood is esteemed, especially for the beautiful structure of the „grain“. Regular and simple fiber and color, which are characteristic of mahogany, give it a very elegant character.

The average wood density: 670 kg/m³

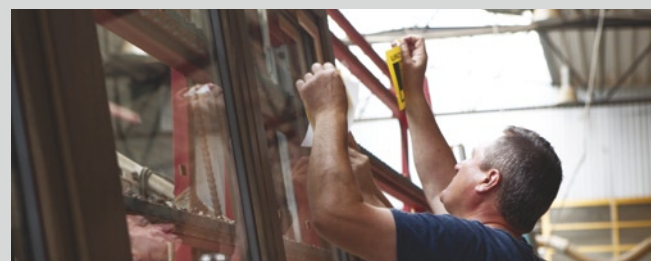

IN LATIN, SAPELE MEANS SPIRITUALITY,
HEALING AND GROWTH.

FUNCTIONAL SPACE

Our products are created based on the highest standards of functionality and modernity. We make every effort so that every home can be luxurious and comfortable, thanks to the applied solutions. The windows and doors from Urzędowski, allow you to create space with a harmonious character, tailored to your individual requirements.

CO-OPERATION OF MAN AND MACHINES

The combination of the human element, along with technology, gives our manufactured products a soul, and technical excellence. The wood is selected under the watchful eye of an experienced crew who support the work of the first-class equipment. Combining these two planes allows us not only to carry out production on a large scale, but also to create both excellent and unique products.

THE COMBINATION OF THE HUMAN
ELEMENT, ALONG WITH TECHNOLOGY,
GIVES OUR MANUFACTURED PRODUCTS
A SOUL AND TECHNICAL EXCELLENCE.

DAILY JOY AT HOME

We care about how best to understand the needs of our clients. Their satisfaction is our main goal. That is why we work so that a house can be accompanied by peace and comfort. Fulfilling our clients' expectations, we provide them with a comfortable space where they will be happy to come back to every day, and which next generation will be able to enjoy.

IROKO

This wood, which is pleasing to the eye, owes its origin to mystical and tropical Africa. The term Iroko means: a man of success who is independent, fulfilled and hard working on the ground.

The average wood density: 660 kg/m³

IROKO OWES ITS ORIGIN
TO MYSTICAL AND TROPICAL
AFRICA.

THE SYMBOL OF QUALITY

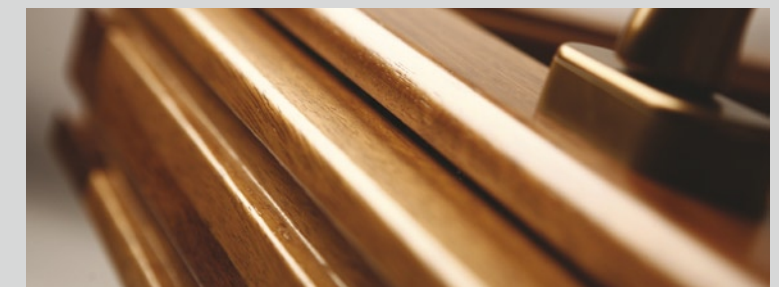

Systematic improvement of quality standards and product functionality has assured us the position as leader in production of wooden windows and doors. Our products are characterized by their reliability, durability and interesting design. The brand Urzędowski guarantees that it will be the standout wood in each home.

OAK

This wood has become a symbol of durability, strength and solidity. It is classified as being a precious species, with impressive durability and strength. Abrasion-resistant and long-lasting, it combines elegance with easy availability. It does not deform and is not subject to biological corrosion. It is used by famous whiskey distilleries to make oak barrels which are crucial in the production of their product.

The average wood density: 850 kg/m³

OAK HAS BECOME A SYMBOL
OF DURABILITY, STRENGTH
AND SOLIDITY.
