a commercial offer

✓ Production of damping devices:

- The device damping frictional KMT-118S class T1 GOST 32913
- The device damping frictional PMKP-110 class T1 GOST 32913

✓ Serial and small-scale production of alloy steel and iron castings:

- Steel casting from HTS
- Weight of castings from 15 to 180 kg
- The max size of castings 600x700x250 mm
- Shot peering of castings
- Preparation for casting production based on customer's drawings, samples or sketches
- Design and manufacture model equipment

✓ Serial and small-scale production of castings from non-ferrous metals and alloys:

- Chill casting
- Weight of castings up to 5 kg

✓ Injection molding:

Production of goods from thermoplastic elastomer, polyurethane, polypropylene, polyvinyl chloride, polyethylene, other plastic grades and polymers (except glass-filled).

- Weight of products up to 6.5 kg and a max size up to 2 m.
- Wall thickness from 3 mm

✓ Products of any configuration from sheet metal, including stainless steel:

- Steel thickness from 0.5 to 10 mm, dimensions up to 3 m
- Laser cutting
- Welding work
- Mechanical restoration

Delivery terms: EXW Bryansk
